

Instructions

How to run my solutions:

To run locally on version n with p number of peers, use the following commands:

```
make run VERSION=n PEERS=p
```

To run on docker on version n with p number of peers, use the following commands:

```
make drun dockerrun VERSION=n PEERS=p
```

Note that after running this command, use commands:

```
make kill
```

or

make down

to stop and remove the containers.

The project has the following structure:

```
|— README.md
|— lib
   |   |— broadcasting.ex
   |   |— dac.ex
   |   |— broadcast1
   |   |— broadcast2
   |   |— broadcast3
   |   |— broadcast4
```

```
|&nbsp;   |— broadcast5  
|   |— broadcast6  
|— test
```
